

, most energy efficient

### Wide Range of Applications

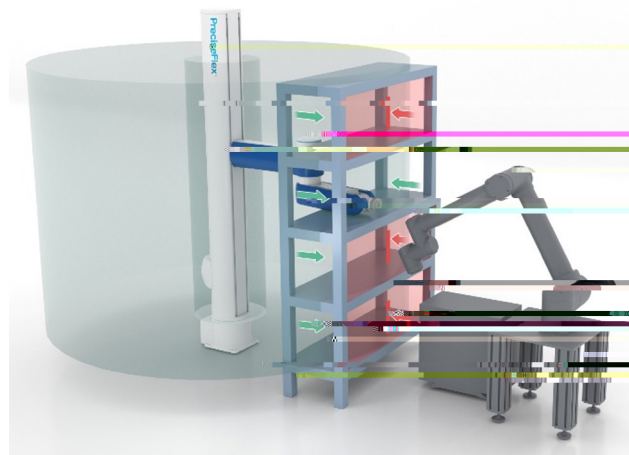

As a result of its compact design, the robot is suitable for a wide range of applications, including assembly, material handling, and machine tending.

### Lowest power consumption

The robot's compact design and efficient motor drive result in the lowest power consumption of any robot in its class.

### Highest Workspace Density

As a result of its compact design, the robot is able to fit into a small footprint, making it ideal for use in high-density workspaces.
